... so if anyone could tell me please how to get started and get me going. I would really appreciate it. i can download videos and my images off the internet but for some reason i cant do that with GIFs. i also cant make GIFs. is there a tutorial or a link to a tutorial somewhere because i cant figure it out. A: Tutorial for Android Step 1. Download the GIF from a website. Step 2. Open GIF file in an editor that supports GIFs Step 3. Save the file in some GIF software. For example Photoshop Elements. Step 4. Open the saved file in GifTools. Step 5. Select all GIF image frames, it means all frames selected. Step 6. Open options and enable clip options. Step 7. Choose the GIF file folder and select a folder. Step 8. Click on convert. Step 9. Done! In step 3 if you don't find the editor in the android's sdk install the software's apk using sdk manager in eclipse. Hope it will help you. A: Easy steps to convert a gif into a.png: Click on your.gif file in the file explorer. Click on "view" Click on "expert" Scroll down on "unwrap" and click on the box that appears. Click on "ok". > 0 IBCocoaFramework com.apple.InterfaceBuilder.CocoaPlugin.macosx com.apple.InterfaceBuilder.CocoaPlugin.Interface
