In 1987, Autodesk released the AutoCAD Full Crack LT for the Apple Macintosh, and in 1991 the first Windows version, AutoCAD Torrent Download Classic, was released, replacing AutoCAD Crack For Windows 90. AutoCAD LT was later renamed to AutoCAD 2D, and 3D versions of AutoCAD and AutoCAD LT were introduced, providing the full power of AutoCAD and AutoCAD LT for personal, business, and commercial use. AutoCAD LT 3D, introduced in 1999, introduced parametric modeling and is an expansion of the 2D capabilities of AutoCAD LT. In 2002, the Intergraph/Autodesk version of AutoCAD was introduced as part of the GIS (geographic information systems) suite, integrating the GIS and CAD functions of GIS software and enhancing its design and drafting features. AutoCAD and its cross-platform counterpart AutoCAD LT are the most widely used commercial CAD programs. Autodesk estimates that there are over 600,000 AutoCAD users worldwide, and that there are over 100,000 AutoCAD LT users. Another 30,000 AutoCAD users are estimated to be users of Intergraph CAD, and around 5,000 are estimated to use other CAD programs. In addition to AutoCAD and AutoCAD LT, Autodesk produces several other types of CAD software. In 2007, Autodesk acquired the world's largest 3D and architectural design software firm, AECOM Technology. AECOM is the third-largest provider of architectural and engineering design software. Autodesk bought Insight Design in 2009 and has since integrated it into the Autodesk Design Suite.

AutoCAD became the most widely used 3D CAD software in the world in 2007, surpassing the number of users of CAE (computer-aided engineering) and other CAD software programs, according to Jim Magnuson, CEO of Autodesk. However, in 2011, 3D software is still lagging behind 2D software, with Autodesk estimating that more than 100,000 professionals are using AutoCAD 3D and in 2013 that number is likely to be less than 30,000. Autodesk uses a subscription-based product pricing model. The price varies depending on the number of computers in an organization, but the average price for AutoCAD and AutoCAD LT is approximately \$2900 per seat. In addition to its native Windows and macOS editions, Autodesk also offers
